

Considering installing a geothermal heat pump? Meet IMU's efficiency standard and receive a rebate!

Indianola Municipal Utilities Geothermal Heat Pump Rebate Program

Install an energy efficient geothermal heat pump in your home and Indianola Municipal Utilities will send you a **\$100** rebate! The unit must have a 12 SEER (Seasonal Energy Efficiency Rating) or higher.

Geothermal heat pumps can significantly reduce primary energy use for building heating and cooling. GHP's extract natural heat stored in the earth, circulating it through underground pipes to keep homes warm in the winter and cool in the summer.

Rebate Amount for Qualifying Units:
12 SEER Rating = \$100 in Chamber Bucks*

Qualifications:

- Geothermal unit must be installed in a residence served by IMU.
- Geothermal unit must be rated as at least a 12 SEER.
- Geothermal unit must be properly sized for the home.

Application Requirements:

- Completed and signed rebate form (obtained from participating dealer or IMU).
- Original itemized invoice providing the make, model and SEER of the unit purchased and installed.

**Chamber Bucks are accepted at all Indianola area businesses and may also be used to pay your IMU utility bill.*
